Between Mr. Richard Kirtsborne (636-479-6317) and Bruce Morrison

I, Bruce Morrison called Mr. Kirtsborne at his workplace for the purpose of discussing a yard restoration inspection conducted at his property in Herculanum (928 St. Joseph) on November 18, 2003. I told Mr. Kirtsborne that the settlement of yard restoration issues should be done via a meeting between himself, Gary Walker (Doe Run), and Jim Silver (EPA). At that meeting each restoration issue would be inspected, discussed, and a resolution decided upon. I told Mr. Kirtsborne that Doe Run or EPA would address the concrete rubble in the ditch, the dirt around the three trees, and the removal of one tree stump. I also said his yard would be reseeded this coming spring if he had the leaves removed. I specifically told Mr. Kirtsborne twice that no additional fill would be brought in and that the erosion in the back yard resulting from the upgradient neighbor's drainage pipe outfall would not be addressed by Doe Run or EPA.

These are the items
to be addressed to Doe Run
on my property,

Dirt mounds around some
trees

Tree stump to be removed

Erosion problem on lower
slope.

Level of yard in certain areas

Need more dirt fill

Needs to be seeded again
because of lack of grass
growth. Compared to other
properties done by Doe Run
after mine.

Concrete thrown in ditch not
removed as you had told
me on the phone that it was
Some gravel washed into my
yard from neighbors yard which
you said you would have it
removed.
